Summary

Next.js Developer & Agentic AI Engineer

High-velocity developer specializing in scalable web solutions and autonomous systems. Expert in architecting **Next.js** applications and deploying intelligent agents via the **OpenAI Agents SDK, n8n, Eve** and more. I bridge the gap between full-stack engineering and AI orchestration to automate complex workflows and deliver production-ready, maintainable code.

Education

Agentic AI Engineer, GIAIC 	2024 – Present Karachi, Pakistan
Full-stack Developer, GIAIC 	2023 – 2024 Karachi, Pakistan
Intermediate, Adamjee Govt. Science College 	2023 – 2025 Karachi, Pakistan
Matriculation, <i>PIA Model Higher Secondary School</i>	2018 – 2023 Karachi, Pakistan

Skills

Languages Python, Typescript, Javascript,	Frameworks Next.js, FastAPI, Tailwind CSS
Agentic AI OpenAI Agents SDK, n8n, Eve, RAG, Prompt/Context Engineering	Backend Supabase, Neon (Postgres), MongoDB, Sanity CMS
Authentication Clerk, Better Auth, Supabase Auth	

Achievements

Runner-Up, National AI Hackathon (Linkedin)

Participated in the National AI Hackathon conducted by *Systems* and *Google*, hosted by Innovista Indus. Collaborated with a team to design and develop a multi-agent AI system for frontline emergency services, focusing on real-time decision support, task coordination, and rapid response. Demonstrated strong problem-solving, teamwork, and adaptability under intense time constraints, securing the Runner-Up position among competitive national teams.

Projects

Read Buddy

Don't hesitate talking to your books. Read Buddy serves as an intelligent document analyzer, leveraging context-aware chunking to enable the users to talk to their books.

Mentora

The coaching platform for Students. Mentora is an adaptive educational platform, providing Socratic mentorship through custom-engineered persona agents for personalized learning.

Portfolio

Engineered a premium portfolio with Next.js and GSAP, integrating AI as a development partner to architect complex logic and cinematic transitions. Features a bespoke smooth-scrolling engine (Lenis) and bento-style architecture optimized for high-end visual performance.
